

# Slot Recording System

To preserve each individual game video securely

Slot Recording System is a patented technology that secures each game video and proofs of all events of the slot machine automatically. The SRS consists of Slot Recording Device (SRD) installed in slot machine and Slot Video Management Server(SVMS) in the casino control room.

SRD receives signals of slot machine events from SMIB and records full game video during each time from the start to the end of each event, for examples game start/end, door open/close, cash out, bill accept, handpay and more. SRD with SD memory card inserted will be able to record all game videos played in 7 days.

SVMS controls multiple SRD and manages recorded video database. Also it provides convenient UI/UX to casino operators and can support the casino marketing system.

SRS is an essential and convenient solution for :

- External slot recall purpose : recording game video of each slot machine
- Slot video surveillance purpose : dedicated surveillance to each slot machine
- Casino marketing purpose : providing player's game video for his social network

# Slot Recording System

## System Features

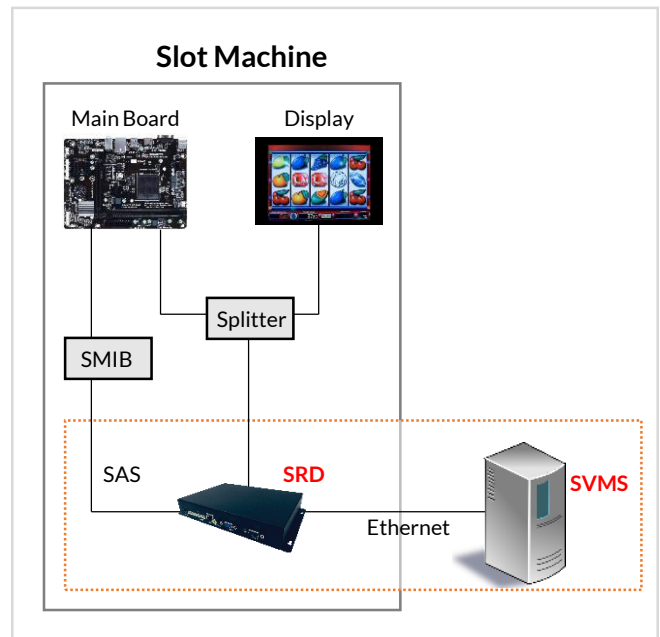

- Slot machine video output is recorded automatically at all events including door open, game start, cash out, bill accept, and handpay etc.
- Input video resolution is supported up to full HD 1920 x 1080.
- Recorded video resolution is 704 x 480.
- Recorded video data is protected from manipulation.
- Recorded video data can be searched by slot machine, event, time etc.
- Time synchronization.
- Low power consumption.

## Benefits

- Reliable and cheap solution for game recording by using SRD and memory card
- Dedicated surveillance to each slot machine by keeping all event data and proofs
- Provide players the chance to share their game video through SNS, which will also advertise the casino
- Attracting players by showing daily jackpot video through digital signage located in casino entrance

## What we offer

- Game recall purpose : SRD only
- Surveillance & marketing purpose : SRD + SVMS
- Technical support and training for integration

## Specifications

Video I/O	1 VGA input 1 VGA output
Input video resolution	800 x 600 to 1920 x 1080
Encoding	H.264 480p 30 fps
Recording time	Automatic
Storage	SD Card 128/256 GB
Network	100 Mbps Ethernet
SAS connection	Serial
Control port	USB / Serial
Power supply	DC 5V 2A
Dimensions	200 x 40 x 140 mm 7.9 x 1.6 x 5.5 inch
Weight	869 g 1.9 lb
Operating temperature	-10 to 70 °C 14 to 158 °F
Storage temperature	-25 to 80 °C -13 to 176 °F
Humidity	95% non-condensing
